# Blog com histórias & fofocas sobre fármacos

## De fármacos e suas descobertas

Pretende-se tratar de temas, opiniões, comentários sobre a Ciência dos Fármacos, seu uso seguro e benefícios. História da descoberta/invenção de fármacos e aspectos da formação qualificada de universitários e pós-graduandos nas Ciências dos Fármacos também são de interesse.

The molecule diagram shows a central pyridine ring with a green nitrogen atom. It has two green double bonds. A blue bar with a white 'F' is attached to one carbon. A cyan question mark is attached to another. A black line connects the third carbon to a cyan pyridine ring, which is further connected to a light blue circle containing a blue 'NH'. A black line connects the fourth carbon to a red hexagon (benzene ring), which is connected to a black line ending in a black 'CH<sub>3</sub>' group.
